

Manufacturer of Bridge Components

GAM 182 HE Mastic

Data sheet

Mastic used with the RE products

GAM 182 - HE

Bitumen Rubber, Ideally used with rubber based materials.

It is a thick black rubbery type substance that requires preparation prior to use. This is acquired by heating the substance indirectly at a high temperature before use.

Some properties:

- Allows joint movement
- excellent adhesion to many substrates
- withstands constant water immersion
- Hard wearing.

Specifications

Manufactured to ASTM D1190 & ASTM D5329

NO	Property	Unit	Test Result
1	Pouring Temperature	170 C	Good / Excellent
2	Core penetration	@ 25 C	10-1 mm
3	Flow	@60 C	-1
4	Resilience / Recovery	%	47
